## Health Services: Keeping Students Healthy and Happy

This CD gives all the information you need to implement a quality Health Service program for your students and staff. Although based on laws in Oklahoma, the content for administering health services to students does not change. The CD provides information on how to respond to normal development; promote health and safety; intervene with actual and potential health problems; provide case management services; and actively collaborate with others to build student and family capacity for adaptation, self-management, self-advocacy, learning and to maintain, improve and promote the health of the school age child.

### Key Benefits

- Define the role of your school health provider
- Establish wellness, safe, healthy and fit school policies
- Effectively manage medication to avoid legal risk
- Know when and how to report child abuse
- Set-up a strong health-records management system
- Train staff on how to deal with blood spills and body fluid, safety and first aid, Epi-Pen administration, glucagon administration, and head lice.
- Set up a quality vision, hearing and body-mass screening
- Create effective end-of-year health services reports and state compliance reports
- Know how to include health services in the student registration and enrollment process
- Learn best techniques for giving student healthcare education and maintaining health service supplies
